W e b D e v e l o p e r

A dedicated and self-motivated IT Professional, with valuable experience and strong interest in web development and web content management. My experience goes way back in time, where CMS did not exist. Websites were then developed by converting psd graphics to html, writing plain html and php code and using mysql databases. I have worked on several web development projects over the years, ranging from full website development to small assignments like e-shop customizations. Since 2010, I work for a public organisation where among other duties, I develop, manage and maintain websites according to the needs, by means of popular content management systems such as joomla and wordpress. I have recently graduated of an online web development course, during which I updated my knowledge in html, css, javascript and jquery and developed several projects. Through the years of professional work, I have developed excellent interpersonal, communication and organisational skills. Proactive in style, I always try to stay abreast of the latest trends and developments and enjoy being part of a successful and productive team.

Web Development • Web Programming • Web Design • Front End • HTML5 • CSS3 • CMS • Joomla • Wordpress • PHP • MySQL • Apache • Bootstrap • Javascript • JQuery • Responsive Design ● Adobe Photoshop • Adobe Illustrator • Corel Photopaint • Corel Draw • Dreamweaver • Domain Administration • Google Analytics • cPanel • Plesk Panel • UX • Microsoft Expert

PROFESSIONAL EXPERIENCE AND ACHIEVEMENTS

IT Manager – Web Developer   2010 - Present
Municipality of Paggaio, Greece

As an IT Manager, daily responsibilities involve a wide range of tasks. Among others, I design, develop and maintain several websites according to the organisational needs.

Key achievements:

- Designed and developed the official website of the organisation, http://www.dimospaggaiou.gr.
- Insert and manage web content and continually improve the official website of the organisation.
- Adjust website interface and aesthetics according to the needs of the administration.
- Process, edit and adjust images, videos and sounds and import them into websites.
- Manage organisational main domains as well as parked and add-on domains.
- Manage organisational youtube channel, issuu account and other web related accounts.
- Manage and publish reports of website's traffic statistics via cPanel and google analytics.
